

Face & Body Rejuvenation Workshop

Join us for an exclusive workshop with two highly distinguished experts in the field of laser face and body rejuvenation.

During this unique workshop you will get the chance to see up close how a Professor of Dermatology with a PhD in Laser Dermatology approaches the art of facial rejuvenation. We will also tackle body rejuvenation with one of the best worldwide experts in laser medicine with over 15 years of education and experience in this field.

Key Objectives:

- **Parameter Mastery:** Understand the effects of different parameter settings and learn how to identify ideal configuration for specific conditions and applications.
- **Indications Overview:** Gain insights into the diverse and growing range of indications for laser treatments.
- **Scientific Insights:** Explore the scientific principles guiding these transformative treatments and stay up-to-date with the latest breakthroughs.
- **Laser Excellence:** Learn how to maximize the benefits of Fotona laser systems in your practice, ensuring optimal patient outcomes.
- **Interactive Session:** Engage in lively discussions and Q&A with our expert speakers, sharing experiences and refining your skills.

Speakers

We are privileged to host two leading experts in the field of laser rejuvenation who will share their knowledge and experiences with face & body rejuvenation. This unique workshop promises insights, knowledge, and practical tips that will elevate your practice.

Prof. Ashraf Badawi

In 2007, Dr. Badawi received a PhD degree in Laser Applications in Dermatology from the National Institute of Laser Enhanced Sciences, Cairo University, Egypt. In 2011, Dr. Badawi obtained a second PhD in Clinical Medical Sciences from Szegeed University, Hungary. During his career path, Dr. Badawi has actively participated in more than 350 International Dermatology conferences with lectures and workshops and was directly involved in training more than 3500 Dermatologists all over the world for laser applications in dermatology.

Dr. Badawi has authored numerous papers in international publications in the field of cosmetic dermatology and laser applications in dermatology. He is President of the European Society of Cosmetic and Aesthetic Dermatology (ESCAD) as well as the European Society of Laser Dermatology (ESLD), as well as a member of other medical organizations.

Adrian Gaspar

Dr. Adrian Gaspar specialized in gynecology and obstetrics and later obtained a postgraduate degree in aesthetic and anti-aging medicine. His practice is based in Mendoza, Argentina and in Miami, Florida, U.S.A. He has been a devoted educator, renowned international speaker, and avid researcher in the fields of laser applications in gynecology and aesthetics for the past 18 years. His pioneering contributions in innovative laser treatments have shaped the landscape of current laser applications, having received innumerable awards for these accomplishments.
